

THIS HALF TERM, WE ARE LEARNING ABOUT:

Self Image and Identity

Here are some of the key objectives which we will be learning about:

- Which aspects of our identity might we share online?
- How is our online identity different from the identity we present in real life?
- How and why might I change my identity, depending on what I'm doing online? (gaming, using an avatar, social media.)
- What issues online might make me and others feel sad, worried, uncomfortable or frightened? How can I get help both online and offline?
- How much can we find out about someone from what they post online?
- How can identity online be copied, modified or altered?

If you have any concerns surrounding children's online safety, please contact one of our Designated Safeguarding Leads. Alternatively, help can be access through the CEOPs website.
