MEASLES INFORMATION

Measles is a highly infectious disease, spreading quickly from person to person, especially in schools. A child with measles will infect almost all unprotected children they have contact with. Fortunately, at the present time, we are not aware of measles in the school. However, we can never be too careful so here is some useful information!

Take a look at the NHS website to view more information like symptoms and what to do.

1

Measles outbreaks happen when not enough children have been vaccinated.

2

Measles can be a very serious disease, leading to ear and chest infections, fits, diarrhoea, and damage to the brain. Measles can kill.

3

Your child is at risk of measles if he or she hasn't had the measles, mumps and rubella (MMR) vaccination.

4

Two doses of MMR vaccine are needed to get the best protection.

5

If your child is due to have had 2 doses of MMR but has not yet received them, no matter what age they are, you should contact your GP to get them vaccinated as soon as possible

6

If you can't remember if your child has had any, 1 or 2 doses of MMR vaccine, check his or her personal child health record (the Red Book). If this doesn't help, speak to your GP.

7

If you don't know how many doses your child has had, it's better to have 2 doses of MMR vaccine now rather than risk leaving them unprotected.

8

Your child can have the vaccination at any age with 2 doses a month apart.

Contact the GP surgery if you are worried about symptoms or the vaccination.
